Focus after the 1/10 deadline

by Dave and Giuseppe

After 1/10

cleanup tasks web1.9/web2.0
new view for all tables and detail forms
data-driven forms and dashboard/card configuration
data-driven tables
value defaulting

Cleanup tasks web1.9/web2.0

Highest priority on bugs and missing features - TBD

Testing - Andreas

End-to-end completion - Dave and Michal

Memory leak/React 18 upgrade - John

Splashscreen - Michal

Very hard deadline - 1st of November with most testing already done

New view for all tables and detail forms

All tables with the tasks - Stefano/Joy/Ester
All forms with the new configuration system - John/Joy/Ester

Data-driven forms and dashboard/card configuration

Engine - Giuseppe

Configuration and integration - Dave/Giuseppe

Data-driven tables

Engine - Giuseppe
Configuration and integration - John/Giuseppe

Value defaulting

Boolean expressions to text - Giuseppe

New table - Stefano/Joy/Ester

Contextual integration - John/Joy (with the new form system)

Way of working

We will estimate all tables and forms with t-shirt sizes
We will gather the logged hours for each task
We will extrapolate our velocity

conclusion

team working hard on the missing details after the web1.9/FI
deadline
hard committment to 1st of November deadline
start the restyling and refactoring work on the rest of the application
accelerate through reuse and uniformity
gather velocity data for improved extrapolation
